

ZI-CHEM 1280 Steam Boiler Corrosion Inhibitor

HIGHLIGHTS

ZI-CHEM 1280 corrosion inhibitor is an essential component of the ZI-TECHASIA maintenance protection program of the boiler and after boiler systems.

ZI-CHEM 1280 is a concentrated liquid treatment used to chemically remove oxygen and form a passivating film on metal surfaces in feedwater, boiler water and condensate in steam generating systems.

ZI-CHEM 1280 has the ability to passivate metal surface through the formation of magnetite and cuprous oxide films, it is also able to minimize iron and copper deposits in the boiler by reducing these metals to their more soluble ferrous and cuprous forms.

TYPICAL PROPERTIES

- Appearance: Clear pale yellow liquid
- Specific gravity: 0.88 – 0.95
- pH (10% solution) 7.0
- Freeze point -29 °C
- Flash point (PMCC) 60 °C

PRIMARY APPLICATIONS

The primary feed point for steam boilers is continuous to the deaerator storage vessel via stainless steel injection quill. Alternate location is the feedwater line.

FEEDING & CONTROL

ZI-CHEM 1280 should be injected to boiler or pre-boiler added using a chemical metering pump with liquid end constructed of suitable materials. These include PVC, polypropylene, viton, Teflon and stainless steel.

The dosage will depend on the operating conditions and the chemistry of the water being treated. The normal dosage of treatment is regulated to maintain a residual in the feedwater, boiler or condensate.

Your ZI-TECHASIA technical field specialist will recommend the most appropriate dosage for your particular application on an ongoing basis.

THE BENEFITS

- Avoid unscheduled shutdown due to corrosion problem in the boiler, steam and condensate systems.
- Extended equipment life.
- Provide corrosion protection to the after boiler sections of the system.
- Easy handling due to its liquid form

COMMON APPLICATIONS

- Automotive industries
- Packaging facilities
- Pharmaceutical
- Pulp & Paper processing
- Timber processing

PACKAGING

- 25kg pails
- 180kg drums
- 900kg IBC containers

HANDLING & SAFETY

ZI-TECHASIA maintains a database of material safety data sheets (MSDS) on all our products. These contain health & safety information to assist in the safe and appropriate chemical handling, ensuring the protection of personnel.
